Survey Results

Economic Perception Index = number of “**positive answers** - **negative answers**” for each question

① Livelihood

② Fluctuation of Income

③ Fluctuation of Expenditure

The current state shows 32 points in all, by subtracting “bad” from “good”.
 45 for the future prospects, even more positive perception.
 Lower points by respondents in their 40's and low-income groups.

Index of Livelihood “Better (than last year/will be next year)” - “Worse (than last year/will be next year)”

High index points = “Up” – “Down”: 40, Current state in all / 59, Future prospect
The high-income groups, the higher index points.

Index of Income Fluctuation “Increased (than last year/will next year)” - “Decreased (than last year/will next year)”

Index points = “Up” – “Down”: 59, compared to the last year, while -6, Future prospect Slightly more people intend to reduce spending.

Index of Expenditure Fluctuation “Increased (than last year/will next year)” - “Decreased (than last year/will next year)”
